

Fall Product Girl Delivery Tip Sheet

Girl Delivery has been turned on, at the Council level, for Fall Product for this season. (Only nuts and chocolates are eligible for girl delivery).

Girl Delivery cannot be turned off at the troop or individual girl level.

Caregivers can choose to offer the girl delivered option to the contacts that they upload in the system.

When caregivers log in, under the campaign section, they will select the Emails (View and Send) link.

This will open up the area where the Girl Scout and caregiver can add their contacts. Under the options column they will see the option of girl delivery. If the family wishes to offer girl delivery to that specific customer, they will check the box. If they do not wish to offer girl delivery then they leave the box empty.

Girl delivered items will be shipped to the Troop Leader in mid-December. Troops do not need to order in full cases and you will receive only the amount of product that was ordered by customers.
